Release PV630 SV200

The theme of this release is enhancements in Application Control Manager.

Prerequisites

- This release requires a minimum 6.3 Platform release.
- This release supports an over-install for previous releases. Any modifications to business rules or connectors must be redone. Reach out to your OneStream Software representative for questions regarding the over-install process.
- OneStream strongly recommends uninstalling the UI for Application Control Manager before installation. Any modifications to business rules must be redone.

New

- The upgrade file has been separated to include an ImportAddOn file after installing Application Control Manager. (MP4-82).
- You can update Varying and Non-Varying properties for new and existing members located under member and relationship properties. (MP4-89).

Changed

- Removed administrator checkbox located in Global Settings. (MP4-145).

Fixed

- Added validation to ensure the Step Order is sequential and duplication is identified. (MP4-44).
- If Enforced Global POV is set to true, the source system import uses the Enforced Global POV setting. If set to false, the import process ignores the Enforced Global POV setting and uses the system date and time. (MP4-202).

- A Source system order is retained checkbox has been added. When the source system sort order checkbox is checked, the source system order is maintained upon import. (MP4-18)

Known Issues

- When using Varying properties, if all data does not import, multiple imports may be needed to generate all properties. Review all imports to ensure that all properties are loaded. This can be verified in the logs if Detailed Logging is enabled. This known issue will be addressed in an upcoming release. (MP4-303)

Contacting Support

OneStream Support can be contacted at any time by registering at http://support.onestreamsoftware.com and then emailing support@onestreamsoftware.com.

Release PV630 SV102

The theme of this release is enhancements within Application Control Manager.

Deployment

- This release requires a minimum 6.3 Platform release.
- This release supports an over-install for previous releases. Any modifications to business rules must be redone. Reach out to your OneStream Software representative for questions regarding the over-install process.

New
