Administrator Solution Tools Release PV6.2.0 SV101

Fixed

- The MarketPlace .zip file package contents was missing the extensibility rules XML, which was causing Log Cleaner to not run properly. (MP3-1848)

Known Issues

- When selecting a preview in Home Page Manager, solutions that contain multiple embedded dashboards may not display. This issue only occurs in the OneStream XF browser version. The OneStream Application for Windows displays all preview pages as normal. (13607)
- Business Rules that are more than 29,000 lines can only be viewed in the Business Rules section, allowing you to view the current version of that Business Rule. (MP3-536, MP3-587)

Contacting Support

OneStream Support can be contacted at any time by registering at http://support.onestreamsoftware.com and then emailing support@onestreamsoftware.com.

Administrator Solution Tools Release PV6.2.0 SV100

The themes of this release are incremental improvements, including the initial release of Business Rule Viewer.

Deployment

- OneStream strongly recommends an Uninstall UI.
- Use OneStream platform version 6.2.0 or later with this version of Administrator Solution Tools.

New Features and Enhancements

- The Business Rule Viewer dashboard allows you to view all current and historical versions of Business Rules. (MP3-264)
- The Member Formula Viewer dashboard allows you to view all current and historical versions of Member Formulas. (MP3-91)
- The Business Rule and Member Formula Historical grids show all updates made to business rules or member formulas within a specified day range. The grids have grouping capabilities, and you can select any record in the grid to view that version of the selected business rule or member formula. (MP3-67)
- In the Global Settings, Administrators can specify access to the Business Rule Viewer (for administrators only) (MP3-98)

Changed

- The Types to Clear settings in the Log Cleaner are set to **No** by default, and changing any of these settings to **Yes** then displays the Execute button to clear logs based on the settings. (MP3-44)

- The Dimension Library or Business Rule page opens in a new dashboard tab when launched from the Business Rule Viewer. This is new functionality specific to the Business Rule Viewer. (MP3-205)
- The Log Cleaner uses parentheses instead of brackets when writing an error description in the error log, allowing records to be properly deleted. (MP3-574)

Fixed

- When creating a formula using the Member Formula Builder, a blank formula check is done before the formula is saved, which ensures that the platform Dimension Library contains no blank formulas. (MP3-579)
- In the Logs by Date tab of the Log Cleaner - Log Analysis page, the Logon Activity correctly displays in a single column. (MP3-607)

Release PV430 SV100

The theme of this release is the initial solution launch of a toolkit for OneStream administrators that combines several solutions in a single dashboard for ease of use.

Release Date

09/26/2019

Deployment

- The Administrator Solution Tools solution requires a clean install, as it is the first version.
- This version requires an Uninstall UI (under Settings) of previous versions of Home Page Manager and Log Cleaner prior to installing. This will remove the prior user interface artifacts (only) in preparation of loading the new solution. See the related Instructions document for deployment details and how to remove previous releases of Home Page Manager and Log Cleaner solutions.

New Features and Enhancements

- Home Page Manager
    - Added the ability to clear the Home Page for users and groups. (8690)
    - Added the ability for Admins to view the current Home Page for individual users before changes are made as well as preview the new Home Page selected. (10901)
- Member Formula Builder
    - New dashboard solution created to allow users to create and maintain basic formulas with ease. (10498)

Changed

- Home Page Manager
    - Updated the user interface to new OneStream standard.
- Log Cleaner (LCR)
    - Updated the user interface, including charts, to new OneStream standard. (11783).
